ADRIAN HALLER

Managing Director, Bruderer UK Ltd

Chairman, Metalforming Machinery
Makers Association (MMMA)

Dear Members

As Chairman of the MMMA, I would like to welcome you to the 2024 Members' Directory. I trust that this will provide a useful tool in us all achieving our collective goals.

At the heart of the MMMA's activities is the highly anticipated MACH Exhibition. This event holds special significance for us, particularly due to the Metalworking Village that we proudly host bi-annually. This village epitomises the essence of the MMMA, providing a unique platform for customers, as well as professionals in training and sales, to immerse themselves in the latest advancements in the world of metalforming.

New developments are always a thrill to show. I am particularly excited about this year's showcase of cutting-edge technologies, where Bruderer UK is set to unveil its groundbreaking press, the BSTL 350-88 in an exclusive UK launch. Within the Metalworking Village, visitors will have the opportunity to witness a comprehensive demonstration of the BSTL 350-88, and receive full details of our new-to-the-UK BSTA 710-220B press, alongside a plethora of state-of-the-art technologies presented by our esteemed MMMA members.

In addition to unveiling new innovations, we are eager to welcome new members into our community, offering them insights into the MMMA and encouraging their participation. This year's Metalworking Village in Birmingham promises to attract industry professionals from across the globe, making it an exceptional event for both the sectors we operate in and the MMMA. I invite you to join us and be part of this remarkable experience.

I must also highlight the MMMA Gala Dinner, an annual event where we celebrate the outstanding talent within our industry through prestigious awards. This year, we are expanding our awards ceremony to further honour the remarkable contributions of individuals and businesses in the metalworking industry.

As Chairman of the MMMA, it is a privilege to lead an organisation that not only recognises the significance of our sector but also actively advocates for the diverse needs of our members, whether it pertains to technology, workforce development, human resources, or financial support.

Our mission at the MMMA is to elevate our members' businesses and products within the manufacturing sector through various channels, including extensive social media presence and collaborative initiatives with leading financial institutions such as Lloyds, Compass Finance, and Finance for Industry, leading specialists in finance for engineering, print, plastics and machinery.

Moreover, the MMMA serves as a unified voice for our industry, providing a platform for open dialogue and constructive discussions on pertinent issues affecting our members, ranging from financial challenges to regulatory compliance.

Reflecting on our journey, I am immensely proud of the MMMA's growth over the past 12 years, evolving from a modest membership to a robust community of 52 members. This growth underscores the resilience and vitality of the manufacturing industry in the UK, which remains integral to the UK economy and the global manufacturing landscape.

Looking ahead, we are optimistic about the government's proposed investment in our sector and remain committed to driving innovation and excellence within UK manufacturing. Despite external challenges such as geopolitical tensions impacting trade routes, we are steadfast in our dedication to promoting domestic manufacturing and nurturing the next generation of skilled professionals.

As we navigate the opportunities and challenges that lie ahead, let us remember that manufacturing is deeply ingrained in the fabric of our nation's history and identity. The MMMA stands as a steadfast supporter of UK manufacturing, and together, with the enthusiasm and dedication of our members, we are poised to shape a vibrant and prosperous future for our industry, one that is not only economically significant but also socially impactful.

I invite you to immerse yourself in the excitement of this year's MACH exhibition and join us in the MMMA Metalworking Village, where innovation meets collaboration. Your participation is key to realising the collective vision of a thriving manufacturing industry.

Warm regards,

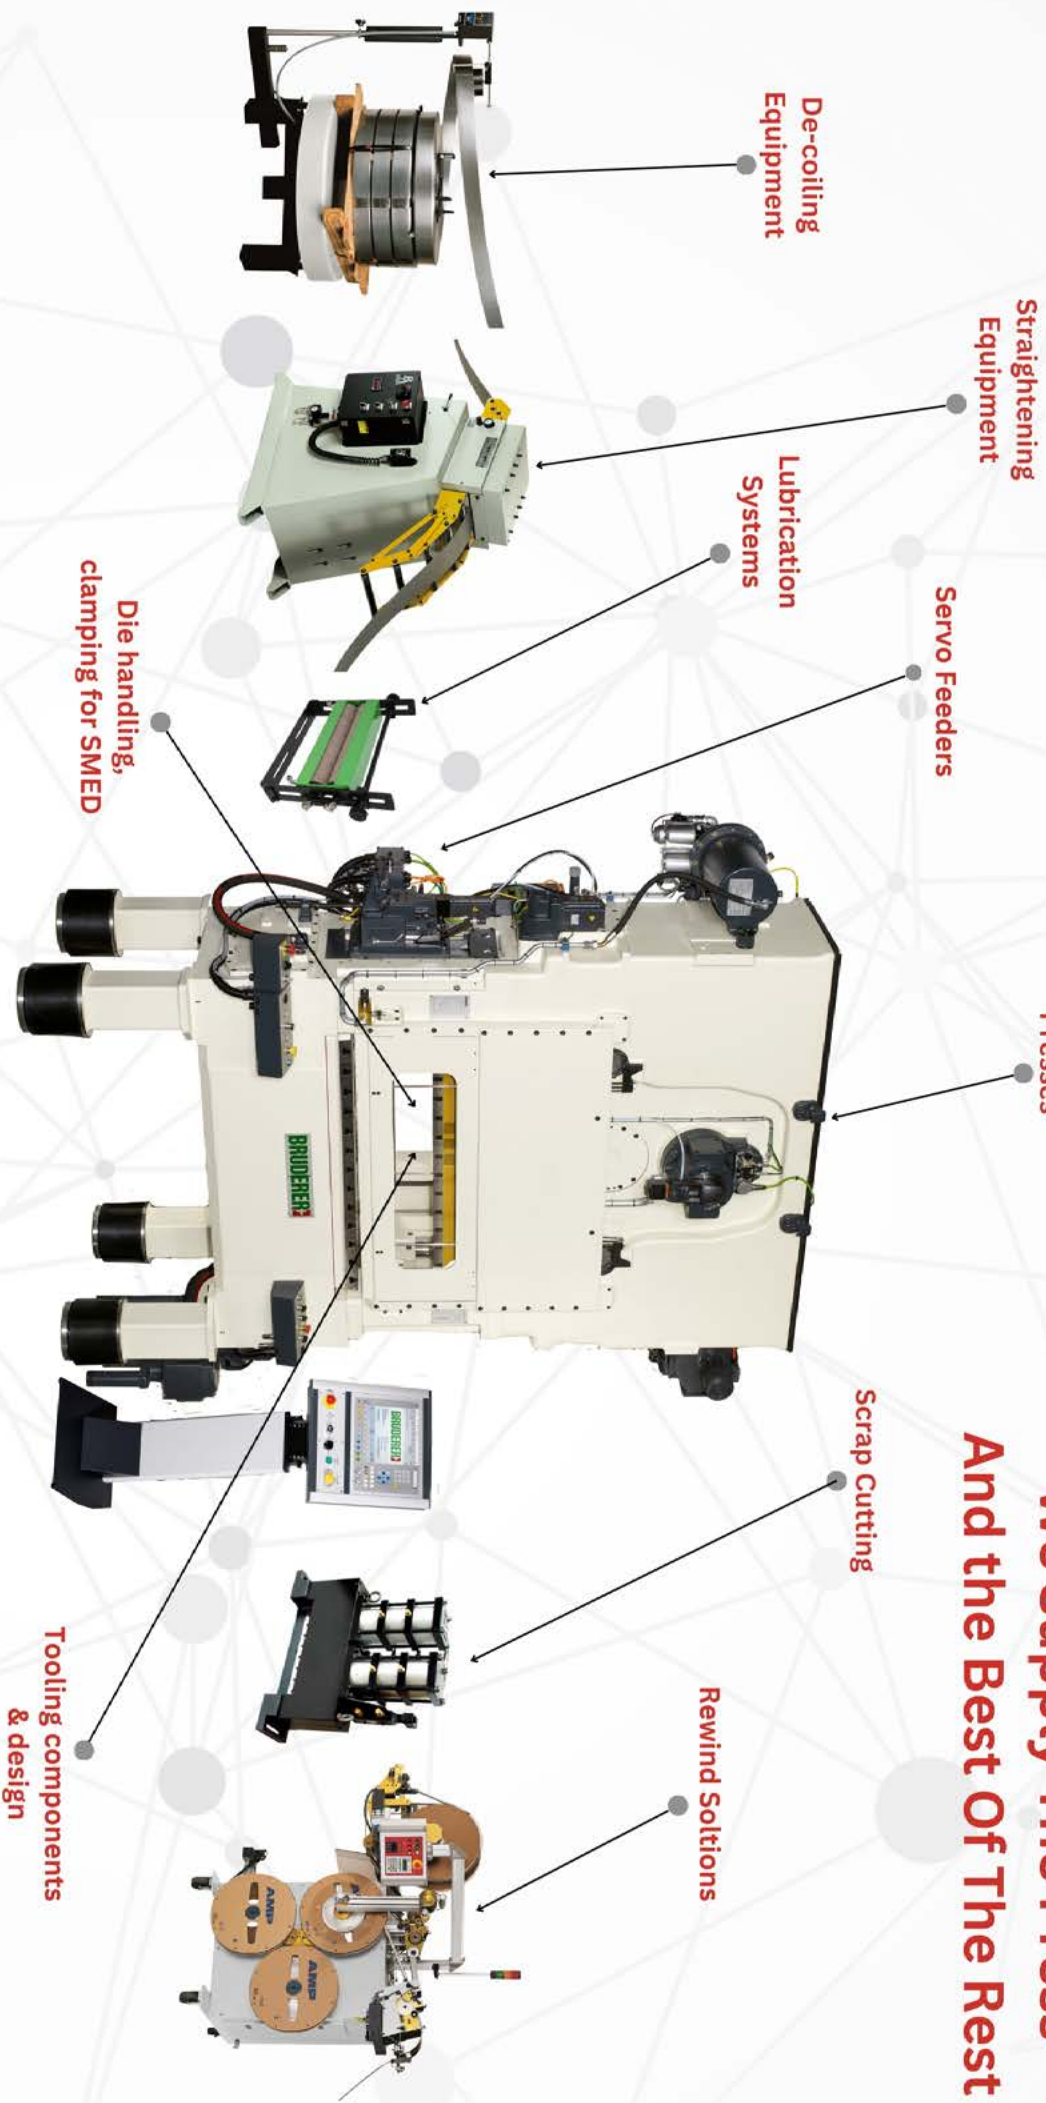

**Managing Director, Bruderer UK Ltd

75 YEARS

OF PIONEERING PROGRESS: THE METALFORMING MACHINERY MAKERS ASSOCIATION

The MMMA's 75th Anniversary is an opportunity to celebrate its rich heritage and achievements while anticipating a promising future, forging new paths in the metalforming machinery industry

This year marks a significant milestone for the Metalforming Machinery Makers Association (MMMA), an institution that has been at the forefront of the UK's sheet metal industry for 75 years.

A journey of growth

The MMMA's journey is one of growth and adaptation. Established in 1949 to form a central national organisation for manufacturers in the Power Press making and allied Industries, what began as the British Power Press Manufacturers Association has evolved into a cornerstone entity, dedicated to representing the multifaceted needs of the sheet metal and forming industry.

In 1971 it became the MMMA, to encompass manufacturing companies outside the UK. The MMMA is the only association to represent the needs of the sheet metal industry and, more recently, its associated technologies, demonstrating its commitment to supporting an industry defined by technological innovation and service diversity.

The MMMA maintains a steadfast dedication to driving innovation in UK manufacturing. Its approach is one of collaborative strength, establishing partnerships with niche companies to provide its members

with comprehensive support that spans a range of vital business sectors including insurance, finance, health and safety, human resources, and legal counsel.

These efforts have been crucial in boosting productivity and setting the standard for industry practices.

A landmark celebration

As the MMMA approaches its 75th Anniversary in 2024, the occasion is not just a look back at its history, but also a moment to cast an eye forward to the promising future of its members and the manufacturing sector at large.

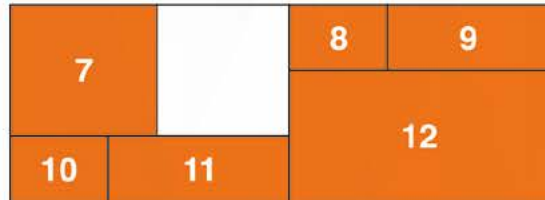

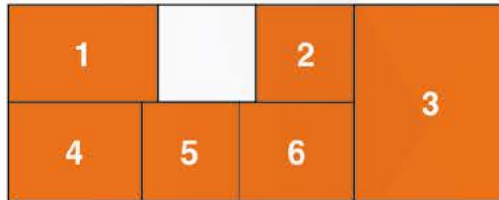

As a steadfast advocate for progress, sustainability, and global competitiveness the association is poised to continue its legacy of fostering industry excellence and shaping the future through apprenticeships and training initiatives.

The highlight of the year will be the MMMA Gala Dinner in November 2024. This event promises to be a splendid opportunity for industry professionals to come together and honour the strides made in the sector. The introduction of awards at the gala is poised to become a new tradition, celebrating the achievements

and setting a precedent for future excellence.

As the association embarks on this historic 75th year, it invites members, partners, and the broader community to join in the festivities.

A LOOK AHEAD

MACH 2026 promises exciting things for the industry with the addition of an all-new Sheet Metal, Metalforming and Fabrication Zone

The Manufacturing Technologies Association (MTA) have added a new zone to the floorplan for their flagship event, MACH 2026. Working in collaboration with the Metalforming Machinery Makers Association (MMMA), the new zone will be the home for all companies involved in supplying sheet metal, metalforming, and fabrication technology. Located in Hall 6, the new zone will sit alongside the existing MMMA Metalworking Village, creating a bigger area and focal destination for exhibitors specialising in this type of equipment.

Commenting on the new zone, James Selka, CEO at the Manufacturing Technologies Association (MTA) who owns and organises the event, said: “We have seen a steady growth in exhibitors showcasing flexible sheet metal, tube forming, metalforming, and fabrication technologies as well as an increase in visitors looking for these products for their applications. The zone provides a showcase for suppliers of this technology while making it easy for visitors to see everything in one area of the show. We are delighted to be working with the MMMA to develop and grow this new zone.”

The MMMA Metalworking Village, located in Hall 6 at MACH, is a popular destination for visitors to the event. The additional space allocated for the new zone will complement the existing village, giving visitors even more reason to attend the event. Adrian Haller, Chairman of the MMMA

commented: “This enlarged area presents a wonderful opportunity to come together in strength and display a vast array of production equipment, designed to help improve productivity for UK manufacturing. The MMMA are delighted to be partnering the MTA on developing this area, showcasing our sectors specialisms.”

MACH has seen significant growth trends from diverse manufacturing areas using machine processes such as metal bending, folding, coil processing, cold forming, cutting systems including laser and water jet, fastening, high speed stamping, presses, sheet handling, shearing, welding, punching, plate rolling – to name but a few. The MTA and MMMA both predict this sector will continue to grow, driven by the use of these technologies in modern manufacturing processes.

As the UK’s national event for

James Selka, CEO at the MTA

inspiring, innovating and connecting manufacturing, MACH is the UK’s only event showcasing sustainable, innovative technologies used across the manufacturing spectrum in a live, working environment.

MACH attracts an audience of over 26,000 to meet and network with around 500 exhibitors with business attributed to the most recent event in excess of £180M.

“ We are delighted to be working with the MMMA to develop and grow this new zone

MACH 2026 will see the addition of an all-new Sheet Metal, Metalforming and Fabrication Zone in Hall 6

AW Precision Ltd.

64-66 Somers Road, Rugby, CV22 7DH
Tel: 01788 542271
Email: sales@awprecision.co.uk
Website: www.awprecision.co.uk

Our manufacture of the best quality Punch and Die products on the market, that suit to a large range of universal machines, is the reason that we are the leading manufacturer of these components in Europe and the USA. Specifically selected, the high quality materials we use withhold many attributes that can extend Punch life; high wear resistance, reduced tension, and good stability are just a few qualities we can guarantee.

Aida s.r.l UK Branch

City Road, Derby, Derbyshire, DE1 3RP
Tel: 01332 648200 / 07968 694609
Email: info@aida-europe.com
Website: http://www.aida-global.com

AIDA is a global press manufacturer that offers a diversified product line, total turnkey packages and automation. AIDA's UK facility provides crucial after service support that includes maintenance, stock delivery on spare parts for AIDA, Bliss, Manzoni and Rovetta presses. Aida S.R.l UK Branch is the authorised provider for service, parts and support of all AIDA, Manzoni, Rosetta and Bliss press models.

Anton Saws and Machinery Ltd

Hougoumont Farm, Collinbourne Ducis, Wiltshire, SN8 3ET
Tel: +44 (0) 1264 850490 / 07799887699
Email: sales@antonsaws.co.uk
Website: antonsaws.co.uk

At Anton Saws and Machinery, we have been supplying industrial saw machines across the UK for over 30 years. Our extensive range of band, circular and wood saws come from top quality, well established suppliers and manufacturers from all over the world. We also provide tooling, servicing and supply of all metal forming machines.

AP & T

AP&T UK Branch, 1 Bordesley Chambers, Albert Street, Redditch, Worcestershire, B97 4DA
Tel: 07811 266577

Our distinctive blend of innovation and experience has enabled Esprit Automation to become the leading British manufacturer of CNC plasma cutting machines. Built to last with exceptional quality, first-class service support and the flexibility to meet your needs, Esprit machines are 100% British-made and installed in over 30 countries worldwide. CNC Plasma Cutting Machines CAD/CAM Software Hypertherm Plasma Cutters.

FINANCE FOR INDUSTRY

Part of  Close Brothers Group

Finance for Industry

Unit D Telford Court, Chester Gates Dunkirk, North Chester, CH1 6LT
Tel: 01244 257216
Website: www.financeforindustry.co.uk

Finance for Industry specialises in financing solutions for engineering, print, plastics, and machinery sectors, offering bespoke options. With a nationwide team of experienced finance professionals, they prioritise strong relationships and rapid service. Their Machinery Protection covers mechanical and electrical breakdown, accidental and malicious damage, repair or replacement costs, and transfer of cover, providing peace of mind.

Introducing the Decade 180 Series

In an increasingly competitive global marketplace, efficiency and quality are key to business success. Improve your manufacturing process. Measure, analyse and optimise your production process.

The next generation **Decade 180 Series with MARS Production Recording Equipment** will ensure maximum performance from your power press machinery. Clear, simple to use touch screens allow easy input of parameters and provide valuable data to improve overall equipment efficiency.

Decade Monitoring Solutions Limited
Unit 3, Octagon Business Centre, Miller Street,
Birmingham B6 4NH. Tel: +44 121 3593978
www.decade.co.uk
email: sales@decade.co.uk

What are the benefits of choosing Decade?

Protection

Advanced Load Monitoring provides asset protection for presses and tooling. **Automatic Press Control** extends the life of presses and tooling, by setting limits for cushion, counterbalance and overload pressures. The **Tool Library** stores settings for each tool and die. **Tool Sensors** monitor performance, so costly damage is prevented. **Temperature Monitoring** measures excessive temperature and temperature variation.

Load

Temperature

CAMS

Automation

Smart CAMS are programmable and controlled from the tool library. **Automatic Slide Control** lowers change over time and reduces setting errors. **Tool Library Database** automatically loads the correct saved settings for quick and reliable tool changes.

Production

In addition to the benefits of asset protection and quality assurance provided by the Decade180 Series, **MARS Production Recording Software** provides **Energy Monitoring** and **Downtime Recording**. Easy to analyse traffic light system for each press, with the capacity to monitor multiple machines from one device. Download reports to show operating speed, machine run and stop activity to understand the reasons for downtime and improve overall equipment efficiency.

Formit Ltd.

Unit 3, City Estate, Corngreaves Road, West Midlands, B64 7EP
Tel: 01384 895150 / 07967 098838
Email: sales@formit.co.uk
Website: www.formit.co.uk

Formit excels in roll form tooling and equipment, offering comprehensive solutions from section design to production line setup. Design is streamlined with the German CAD system COPRA. Specialising in 'Duplex,' cladding lines, and quick-change 'C' and 'Z' purlin rollformers, Formit caters to diverse needs like steel framing, plasterers' angle bead, and more. Contact for detailed data sheets on tailored rollforming lines.

KALLER, a world-leading brand for gas springs and hydraulic systems, serves stamping dies, counterbalance, and heavy-duty off-road vehicle suspension. Operated by Strömsholmen in Tranås, Sweden, it's a part of Barnes Group Inc. (NYSE:B) in the U.S. Pioneering gas spring technology since 1983, with roots tracing back to 1876, it boasts a 95% export share, solidifying its global leadership.

Unleash your welding potential

Welding connects metals, industries and people

Professional welders have high requirements for their systems: These include a stable arc for uninterrupted work, as well as easy and intuitive operation. The welding systems must also be robust and mobile, to ensure work can be carried out at any location and at any given time. Fronius welding systems effortlessly surpass these requirements, and also offer further advantages that turn manual welding into a remarkable experience.

WHAT IT MEANS TO BE A MMMA MEMBER

MMMA CELEBRATING 75 YEARS

A message from the MMMA's Honorary President, Pete Waterman OBE

Holding the position of Honorary President at the Metal Forming Machinery Makers Association (MMMA), it's with a profound sense of pride that I serve an organisation instrumental in the advancement of the UK's sheet metal industry over the past 75 years.

The MMMA has come a long way since its establishment in 1949. Originating as the British Power Press Manufacturers Association, it has grown to be the primary trade association representing the sheet metal and forming industry's diverse needs.

In 1971, we expanded our reach to encompass the myriad forms of sheet metal machinery, in line with our commitment to nurturing an industry rich in technological diversity and service offerings.

Our dedication to the sector remains steadfast. We take great pride in delivering substantial value and driving innovation in UK manufacturing.

Through our partnerships with niche companies, we provide our members with comprehensive support in vital business sectors, including insurance,

finance, health and safety, HR, legal counsel, training, and recruitment — essential elements of our endeavour to boost productivity and foster exemplary industry practices.

As the MMMA nears its 75th year in 2024, I am filled with pride reflecting on our history and the bright future ahead for our members and the broader manufacturing sector.

This year, the MMMA Gala Dinner, taking place in November 2024, represents a splendid opportunity to honour our industry's achievements alongside peers, colleagues, and clients. The introduction of awards at the gala is a new step, affirming our belief in celebrating success. I eagerly anticipate the gala on the 1st of November and look forward to many of you joining us for what promises to be a memorable evening.

The MMMA remains a staunch proponent for progress, sustainability, and global competitiveness. As we move into our landmark 75th year,

I am thrilled to be associated with an organisation that is not only steeped in heritage but also geared up for the promising challenges and opportunities both from an industry and next generation apprenticeship and training level.

Pete Waterman OBE

Honorary President MMMA
